FOX EURO2 ALL TYPES

SUBJECT: CLEANING THE FUEL TANK.

Incident:

Deterioration of the sealing "mogul" on the fuel tank causing clogging of the fuel filtre and pollution of the carburettor.

After-sales service solution:

Drain the fuel tank.

Fill the tank with 1 litre of water.

Allow to soak for about 24 hours.

Shake the tank to catch any residual particles, and drain the particle-charged water.

Rinse several times until the water runs clear.

Drain the water and dry the tank completely.

Rinse the tank with petrol at least twice.

Replace the tank cap. P/N **768677**.

Clean the carburettor body and its components with a cleanser Biosane P/N **755700**.

Adjust the carburettor.

Change the fuel filtre.

During a visit to the workshop, check all Fox with cap screwed and replace the cap with the new one (the new cap is not drilled in the Lion).

Time required for servicing: 1.90h including work time and fixed rate equal to 4 litres of fuel for rinsing and filling the tank. Labour code: 7012 Trouble code: 070 Fault codes: FON
