Re: TGB - VIN DECODER

So you have a VIN and want to know what this number can tell you? The 17 characters of the VIN, once decoded will confirm important, specific information about that particular vehicle as it left the manufacturing plant such as the vehicle features, engine type the year the it was manufactured, the country's origin, manufacturing plant, the serial number, etc..

Please use this decoder (customised to suit TGB) to confirm the particulars of any vehicle and ensure appropriate spare parts are ordered and support information obtained.

Vin number position	Information contained
1	Country of origin.
2	Vehicle manufacturer.
3	Vehicle type.
4 to 6	Model & Displacement.
7 to 9	TGB use only.
10	Model year.
11	Assembly plant.
12 to 17	Serial number of the vehicle.

Illustrative Example:

RFCBF9BFA2Y001060

RFC: Taiwan, TGB, Scooter.

BF9: F409 & 150cc.

2: It was produced between 9/2005 & 9/2006.

001060: Unique vehicle identification.

Current model & displacement schedule:

#	MODEL CODE	MODEL NAME	DISPLACEMENT
1	GA5	PALIO	50C.C
2	GF5	ERGON	50C.C
3	GF9	ERGON	90C.C

Stoney Creek Powersports have previously supplied some vehicles under the TGB brand that were produced OEM by a Chinese manufacture without the approval of TGB Taiwan. When dealing with these vehicles our normal TGB spare parts data/system is not suitable. Please fax /email the VIN & vehicle details (colour, displacement) to us and we will attempt to acquire the parts for you on a case by case basis.

Please be aware that in certain cases abnormalities can occur with VIN numbers to the information presented in this document. In these instances we will email the VIN number directly to TGB and get an individual VIN decoding from them.

Regards,

Mojo Motorcycles Spare Parts
